

# DSP-1

## High Performance Stabilized Payload

- The "Payload of Choice" for day and night surveillance applications.
- Superior observation capabilities for very long acquisition ranges.
- Light weight.
- Four (4) gimbal system fully stabilized in azimuth and in elevation for the entire Field of Regard including at the NADIR / ZENITH point.
- Interface external devices such as moving map, C4I system, RADAR and navigation system using all standard communication channels.
- Sensors:
  - FLIR with Continuous Optical Zoom Lens.
  - CCD, 3-CCD or Full HD.
  - Eyesafe Laser Range Finder (Optional).
  - Laser Pointer (Optional).
- Best value for high performance system.
