

LDP

High Performance Stabilized EO/IR/LD Payload

- Day and night surveillance and designation applications.
- Sensors:
 - FLIR with Continuous Optical Zoom Lens.
 - CCD or 3-CCD.
 - Laser Designator/ Range Finder.
 - Laser Pointer (Optional).
- High performance and low size / weight.
- Four (4) gimbal system Gyro stabilized in azimuth and in elevation for the entire Field Of Regard including at the NADIR / ZENITH point.
- Interface external devices such as moving map, C4I system, RADAR and navigation system using all standard communication channels.
- Internal Boresight System (optional).
- Best value for high performance system.
- Easily integrated onto a wide variety of carrying vehicles through a flexible configuration suitable to any specific aircraft or maritime requirement.

Turning Vision into Reality
