

SGA-2

Stabilized Gimbal Assembly

- SGA-2 is a gyro Stabilized Gimbal Assembly, which can accommodate various EO/IR payloads.
- Applications:
Upon integration of the applicable optoelectronic payload, the SGA-2 can be used for surveillance applications on moving/vibrating platforms, such as:
 - High Masts
 - Land Vehicles
 - Maritime Boats
 - Tripod
 - Poles
- Remote Controlled.
- Slip Ring.
- Very High Reliability.
