

# FOX Family

The FOX family includes state-of-the-art thermal imaging OEM cameras that were especially designed for use by defense and homeland security system integrators.

The FOX cameras provide maximum sensor range performance by using proprietary continuous zoom lenses, highly sensitive sensors and unique video enhancement algorithms.

CONTROP's FOX thermal imaging cameras may be integrated with the customer's gimbals or as a stand-alone camera.

CONTROP's FOX family of the thermal imaging cameras have been in worldwide daily operation since the 1990s, integrated in a wide variety of air, land and maritime systems.

Thermal Imaging Focal Length  
 Thermal Imaging detection range to NATO target

### Applications

- Search & Rescue
- Border Surveillance
- Coastal Surveillance
- Weapon Sites
- Law Enforcement
- Perimeter Surveillance
- Protection of Sensitive Sites
- Force Protection
- Maritime Patrol
- Special Operations

### Features

- Various Focal Lengths
- Continuous Optical Zoom Lens
- Automatic or Manual Focus
- Advanced Image Processing
- Lightweight and Compact Design
- Easily Integrated

- High Performance
- Mission Proven
- Fully Integrated
- Cost Effective
- Low SWaP
