

# MEOS-250

## Land Surveillance Systems

The MEOS-250 is a Land System designed to provide detection, recognition and identification capabilities that were especially developed for diverse land environmental conditions.

The MEOS-250 System provides maximum sensor range performance by using highly sensitive sensors and unique video enhancement algorithms.

CONTROP's MEOS-250 System may be integrated with complimentary components in order to offer a full solution for defense and homeland security (HLS) operational requirements.

CONTROP's EO/IR systems have been in worldwide daily operation since the 1990s, on a wide variety of air, maritime and land platforms.

### Applications

- Border Surveillance
- Coastal Surveillance
- Perimeter Surveillance
- Protection of Sensitive Sites
- Force Protection

### Features

- Multi-Spectral Imaging
- Advanced Image Processing
- Integrated with complementary components

<b>MEOS</b> <b>250</b>	
<b>35Kg</b>	
<b>250mm</b>	
<b>5km</b>	

Thermal Imaging Focal Length

Thermal Imaging detection range to NATO target

- High Performance
- Mission Proven
- Fully Integrated
- Cost Effective
- Low SWaP
